
Aanderaa RCM Blue

CURRENT MEASUREMENT PERFORMANCE EQUAL TO SEAGUARD© RCM

INTEGRATED BLUETOOTH AND TWO BATTERY PACKS

RCM Blue for upper ocean current observations

The new self-logging RCM Blue is based on the same proven technology as the ZPulse DCS, sucessfully employed on SeaGuard for many years.

Bluetooth® configuration eliminates the need to open the instrument for downloading and configuration. A LED shows the instrument is "ON".

Deployment time is 19 months at 10 minute interval with 150 pings and with Aanderaa standard Pressure Case. Correct current measurements even at 50 degree tilt.

Specifications:

- Depth rating: 300m
- Range: 0-300cm/s
- Resolution: 0.1mm/s
- Mean accuracy: ±0.15cm/s
- Relative accuracy: ±1% of reading
- Std based on 300 pings
  ZPulse mode: 0.3cm/s
  Single frequency mode: 0.45cm/s (ZPulse off)
- Compass accuracy: ±3°
- Tilt accuracy: ±1.5°
- Temperature accuracy: ±0.1°
- Solid state compass and tilt

Turn on and log data!
